VOLUNTEER EXPERIENCE

KamiLimu Professional Mentor

Mentor-ship program for Students in Science, Technology, Engineering and Mathematics

Safaricom PLC Software Engineer - Integrations

03/2021 - 11/2021,
Nairobi

- Designed and developed a dynamic USSD platform for purchasing mobile data on the *544# menu which processes requests from over 20 million subscribers daily.
- Collaborated in the creation of customized mobile data and voice offers for existing and new customers increasing our daily revenue by over 11%.
- Created custom API integrations for M-Kopa and ShowMax to integrate with our system which led to increased revenues while increasing our customer base.

SmartCodes Technical Lead

11/2019 - 02/2021,
Dar es Salaam, Tanzania

- Managed a cross-functional team of 10, ranging from interns to senior developers and product analysts, and collaborated with software development, product analysis and operations.
- Led the redesign and redevelopment of our flagship product M-paper. Redeveloped the back-end from legacy PHP 5.0 to Laravel 7. Achieved system stability and provided a platform for partner integrations i.e Ezy-Gazeti.
- Managed the design and development of SuperStore, an E-commerce application for Fast Moving Consumer Goods.
- Worked on Kwanza, a real-time advertising platform for digital marketing, first locally built in Tanzania. This created a new revenue channel for the business and cemented SmartCodes' status in digital marketing.
- Liaised with the project manager and stakeholders to ensure the team meets overall development goals in accordance with the product development plan or market requirements and ensured milestones are met.

PixelEdge Software Engineer

11/2019 - 08/2020,
Northampton,
Massachusetts

- Architected and developed a scalable multi-tenant administration dashboard using React, Laravel, and MySQL, enabling seamless client management and improving system administration efficiency.
- Engineered custom API integrations for third-party clients using Laravel, streamlining data exchange and enhancing system interoperability.
- Implemented comprehensive testing infrastructure with PHP unit tests and automated Postman API tests, ensuring reliable system performance and code quality.
